

Using this site

We are passionate about information access, so we've created this website with our users in mind.

Adjust text size

Content text size can be adjusted using the buttons at the top right hand side of the site, next to the "subscribe" button and search field. The large A increases text size while the small A reduces it. Click the circular arrow to reset back to the default size.

Auslan videos

For many people who use Auslan as their first and/or preferred communication, English can be their second language, yet very few websites translate information into Auslan.

Our videos use the standard player playback controls, which allow you to adjust the size and streaming quality of the video or view the video in full screen.

Screen reader compatibility

This site has been designed for compatibility with screen readers. Each page contains descriptive headings and links, ALT text for images and page titles.

General navigation

- To navigate the site, simply click on the categories on the purple bar that appears across the top of each page.
- To return to the homepage, click on the Techfinder logo in the top left hand corner.
- To search for content, type a word into the search bar found in the top right corner and click search or press enter. You will be offered suggestions for pages that contain the key word you are looking for
- Most content pages are available to download as a PDF. The link is found on the right side of the page, under the "Share and Save" icons. If you don't have a PDF viewer, [click here](#) [1] to visit the Adobe website and download one for free.

System requirements

Techfinder.org.au has been built for compatibility with all four major browsers and mobile devices, including Smart Phones and Tablet PCs.

Compatible browsers

Compatible browsers include: Firefox, Internet Explorer, Chrome and Safari. The site will function in earlier versions

of these browsers however it is recommended that you download and install the latest browser version to view the site as it is intended.

Screen resolution

This site has been designed for optimal viewing on a screen of at least 1024x768 pixels.

Internet bandwidth

A broadband internet connection is required to view the site. The site has been designed for compatibility with slower connection speeds; however there may be some delay in streaming YouTube videos on slower connections.
